I need to view “Coupons and Red Envelopes” in “Group Buying”.

**Visual Perturbation 1: Viewport Exclusion (VE)** The agent needs to SWIPE the navigation bar to find the “Group Buying” entrance, but in actual execution, the agent cannot perceive the existence of this element and chooses to click the search button, resulting in incorrect paths or going against the target.
**Visual Perturbation 2: Visual Ambiguity (VA)** The agent needs to view “Coupons and Red Envelopes” in "More", but there are advertisements similar to red envelopes on the page, which leads the agent to mistakenly believe that this is the entrance to coupons and red envelopes.
